# COMFORT WITH CONFIDENCE

Day & Night oil furnaces are designed for the best durability and comfort. Our highest efficiency models are available in multi-position hi-boy with upflow, downflow and horizontal flow options. Our lo-boy model is available in an upflow configuration. Most models can be installed in existing chimneys. Most furnaces come prewired for addition of central air conditioning, air cleaners or humidifiers. The oil furnace can be combined with an indoor evaporator coil and properly matched outdoor air conditioner or heat pump to provide cooling during the warm seasons.

## WHAT MATTERS IN AN OIL FURNACE?

### ENERGY SAVINGS

AFUE (Annual Fuel Utilization Efficiency) measures the heating efficiency of an oil furnace. The higher the number, the greater the potential for energy savings. QuietComfort and Performance Series furnaces offer a range from 86.4% up to 87.5% AFUE.

### CONSISTENT COMFORT

To keep your comfort consistent, QuietComfort oil furnaces operate nearly continuously, making subtle adjustments to adaptable-speed components to match the changing conditions of your home.

### DUAL-FUEL SYSTEM

To help manage unpredictable utility costs, combine a Day & Night oil furnace with a Day & Night heat pump and compatible thermostat. A dual-fuel system automatically switches between electric and oil heating to optimize the efficiency of each fuel source.

### QUIET PERFORMANCE

Enjoy quiet system performance with sound-reducing features that include fully insulated cabinet and flue silencer baffles.

### PEACE OF MIND

Rest easy with a 10-year parts and lifetime heat exchanger limited warranty\* upon timely registration.\*\*

## WHAT SETS DAY & NIGHT OIL FURNACES APART?
